

Brief Description:

“Leqaa Platform “

Leqaa Platform is a minimal social network for researchers . leqaa allows the researcher to post his/her updates (conferences , papers, articles,...etc) and reach other researchers.

Technology:

Database: MongoDB.

Back end: Express js.

Front end: React js.

Features:

Leqaa will allow the researcher:

1. Write Posts.
2. Follow other research
3. add a comment
4. The user can manage an account by deleting or update
5. Communication between researchers to send messages
6. Put questions
7. Jobs ads
8. List the projects that the researcher worked on

Goal :

Connect researchers from different parts of the world.
